

IBURI X WORKATION

IBURI's Teleworking spaces

X-ACCESS

Home to numerous attractive tourist spots, the Iburi region is located close to the city of Sapporo and Hokkaido's aerial gateway, New Chitose Airport.

We understand that many people will be visiting Japan for extended periods of time, and that they may need to catch up with work during this time.

In the Iburi region, enhanced telework facilities have been established to improve convenience for travelers and other visitors in light of the impact of the coronavirus and other factors.

When visiting Hokkaido, in addition to the tourist attractions the Iburi region has to offer, please consider using our teleworking spaces.

*Here we introduce some of the facilities available.
